WORDS OF WELCOME FROM THE AHILA PRESIDENT

It is with great pleasure that I welcome all delegates to this, 14th Congress of the Association for Health Information and Libraries in Africa (AHILA14)

It was a real challenge to be involved in the organisation of this Conference that literally heralds the metamorphosis that is taking place in the information arena. The participation of several distinguished speakers, the impeccable quality of papers submitted and the formidable calibre of presenters meant that the high standards observed at our previous conferences had to be taken a notch higher. However, a dedicated, committed team on the organising committee, and support from our partners and friends who share the same vision has made it possible to put together a programme that is intended to be both professionally and socially stimulating. The conference programme as the theme suggests heralds a very pertinent theme on **“ICTs, access to health information and knowledge: building strong knowledge societies for sustainable development in Africa”** and with the integration of workshops, papers and social programmes, the conference indeed promises to be a stimulating and enjoyable event.

I would like to wish all delegates dynamic and meaningful discussions and I do hope that, you shall also take time to sample the social delights that Dar es Salaam has to offer!

On behalf of the Local Organising Committee and those who have partnered with us to make this event a reality I say: WELCOME! BIENVENUE! BEM-VINDO!

Nasra Gathoni
AHILA President

KEYNOTE SPEAKER PROFILES

Anne Seymour

MS, is the Director of the Welch Medical Library since February 2014. She oversees its informationist and systematic review program, health science digital and print resources, and information services for the Johns Hopkins Medical Institutions. Ms. Seymour and her team of informationists collaborate with faculty, students, researchers, clinicians and staff on the research, teaching, and patient-care missions of the School of Medicine, School of Nursing, Bloomberg School of Public Health and the Johns Hopkins Hospitals. Prior to her recent appointment at Hopkins, Ms. Seymour was the associate director of the Biomedical Library at the University of Pennsylvania. In her work at leading academic healthcare institutions Ms. Seymour has focused on the identification and delivery of evidence-based information at the point of need: in the clinical setting, research lab, and classroom. She has also led the development of research networking and faculty profile systems to enhance the visibility of researchers, enable collaboration and measure research impact. She has a special interest in global health and has applied her expertise in evidence-based practice, health sciences information resources, mobile technology and informatics to the global health arena and to global health partnerships in Botswana and Guatemala.

Prof Maria Musoke

[BSc.Dip. Ed; PGDLib. (Mak); MLib (Wales); PhD (Sheffiled) is the University Librarian of Makerere University Library Services since 2004. She was promoted a Professor of Information Science in 2010. She also teaches at the School of Library and Information Science and supervises graduate students. As part of her post-doctoral contribution to Makerere, Prof Musoke started (a) a cross-cutting course on information competence and management for graduate students and researchers, (b) an MSc-LIS course titled 'Health information systems and services'; (c) an information literacy outreach programme to rural health units. She has done research, published and presented at many conferences. She has been a Keynote speaker at several conferences and occasions including AHILA conference in Malawi in 2004 and Partnerships in Health Information (Phi) 20th Anniversary in London in 2012. She coordinates national and international projects and collaborations. She has received national and international honours and awards. For example: In 2010, she received a Gender Equality Award from Makerere University for becoming the first Ugandan female Professor of Information science, and one of the eleven women Professors Uganda had at that time. She was the ICT stories Award winner in 2001 after joining the competition with a story titled 'Simple ICTs reduce maternal mortality in rural Uganda' <http://www.iicd.org/stories/articles/Story.import47> In 2008, the Document delivery and Resource sharing section of IFLA selected Prof Musoke's paper as the best and became a feature article of the section's newsletter : "We were very happy with all of our papers and speakers in Quebec, who provided an excellent global overview, from Canada, Singapore, Uganda and Austria. We decided ... to feature Dr Musoke's paper, which outlines an excellent model of a hybrid blend between traditional document delivery methods combined with technology driven methods": <http://ifla.queenslibrary.org/VII/s15/pubs/Document-Delivery-Newsletter-Oct08.pdf>
